Membership

Any person who has an interest in the field of biomaterials shall be eligible to be an active member.

Biomaterials and their applications in Artificial Organs, Medical Devices, Tissue Engineering, Nanotechnology, Dental Materials and Drug Delivery are emerging areas for biotechnologists, chemists, physicists, biologists, engineers and medical professionals in India. However, the fundamental and applied research in this multidisciplinary field is still in its incipient stages in India. The objective of this Society will be, not only to cultivate an atmosphere nationwide for the growth of basic and technological oriented research in Biomaterials and Artificial Organs but also to bring the professionals from various faculties together to improve the quality of their approach in future research. This will be done by communicating to all members, arranging conferences, seminars and workshops where learning and exchange of relevant concepts can be stimulated every year.

Membership in the Society shall be open to all individuals without any discrimination of race, sex or nationality, and to recognized bodies, institutions or organizations, who subscribe to the objectives of the Society, according to the rules and regulations.

Benefits of Membership

Members can interact with all the scientists/faculty working in biomaterials, medical devices and tissue engineering field.

Can attend the Conferences and Workshops organized by SBAOI in India at a reduced member rates.

Can attend World Biomaterials Congresses and other International Conferences organized by the International Union of Societies for Biomaterials Science & Engineering or its constituent Societies at a discounted registration rates.

Free news letter and online subscription to the journal published by SBAOI.
